Summary

Enthusiastic and self-motivated Junior Front-End Web Developer with great prioritisation and organisation skills. Eager to expand my horizons in the tech world, I've been engaging with continuous learning and development. Alongside refining my skills in PHP and WordPress, I've started to explore the capabilities of AI and dabble in the practical applications of High Level software, which has introduced me to the basics of digital marketing. My recent projects include crafting websites for a florist and a printing business, integrating WooCommerce for the latter. Although my experience with React, Vue, and MySQL is in its early stages, I'm keen to deepen my understanding and enhance my proficiency in these technologies. I thrive in both collaborative and solo settings, always seeking new challenges to improve digital experiences.

Technical Skills

Front End			
HTML	CSS	JavaScript	React
PHP	SASS	jQuery	MariaDB
WordPress	CSS Frameworks	NodeJS	

Software			Soft
Git/GitHub	MS Office	Command Line	Organisation
Figma	Bash	High Level	Communication
Google Workspace			Attention to detail
